

# Hotel Bookings Analysis

MARTA MALECKA  
DATA ANALYTICS  
FINAL PROJECT  
DEC 2021

# Dataset Overview

## BASIC INFO ABOUT THE DATA SET:

- Booking information for a city hotel and a resort hotel
- Location - Portugal
- Exact location & name unknown
- Only completed (checked-out) bookings
- One full calendar year
- Dataset size after cleaning: 33254 bookings

# Objective

**ANSWER THE FOLLOWING 3 QUESTIONS FOR EACH HOTEL:**

- 1.What is the seasonality and what are the top performing months?
- 2.What are the top countries in terms of bookings and/or revenue?
- 3.What's the most frequent guest type?

**ALSO:**

Delve into the use of Python for data analysis in the hospitality industry

# What's the booking volume along the year?

## CITY HOTEL

Stable march-to-october high season.

## RESORT HOTEL

Deep drop in summer, why?

# Does ADR affect booking seasonality?

## CITY HOTEL

ADR: +54%

—●— Avg. ADR  
■ Bookings

## RESORT HOTEL

ADR: +225%

Is price a deterrent in summer?

# What about the average length of stay along the year?

## CITY HOTEL

Stable ALOS over the year: 2-3 days.

## RESORT HOTEL

ALOS goes up from 3 days in winter to 5-6 days in summer.

# Room nights sold & revenue are better indicators

## CITY HOTEL

June to August - 32% annual revenue

## RESORT HOTEL

June to August - 44% annual revenue

# What are the feeder markets?

City Hotel received guests from 122 countries.

Top regions:

1. Western Europe - 50%
2. Northern Europe - 16%
3. Southern Europe - 16%
4. Latin America - 4%

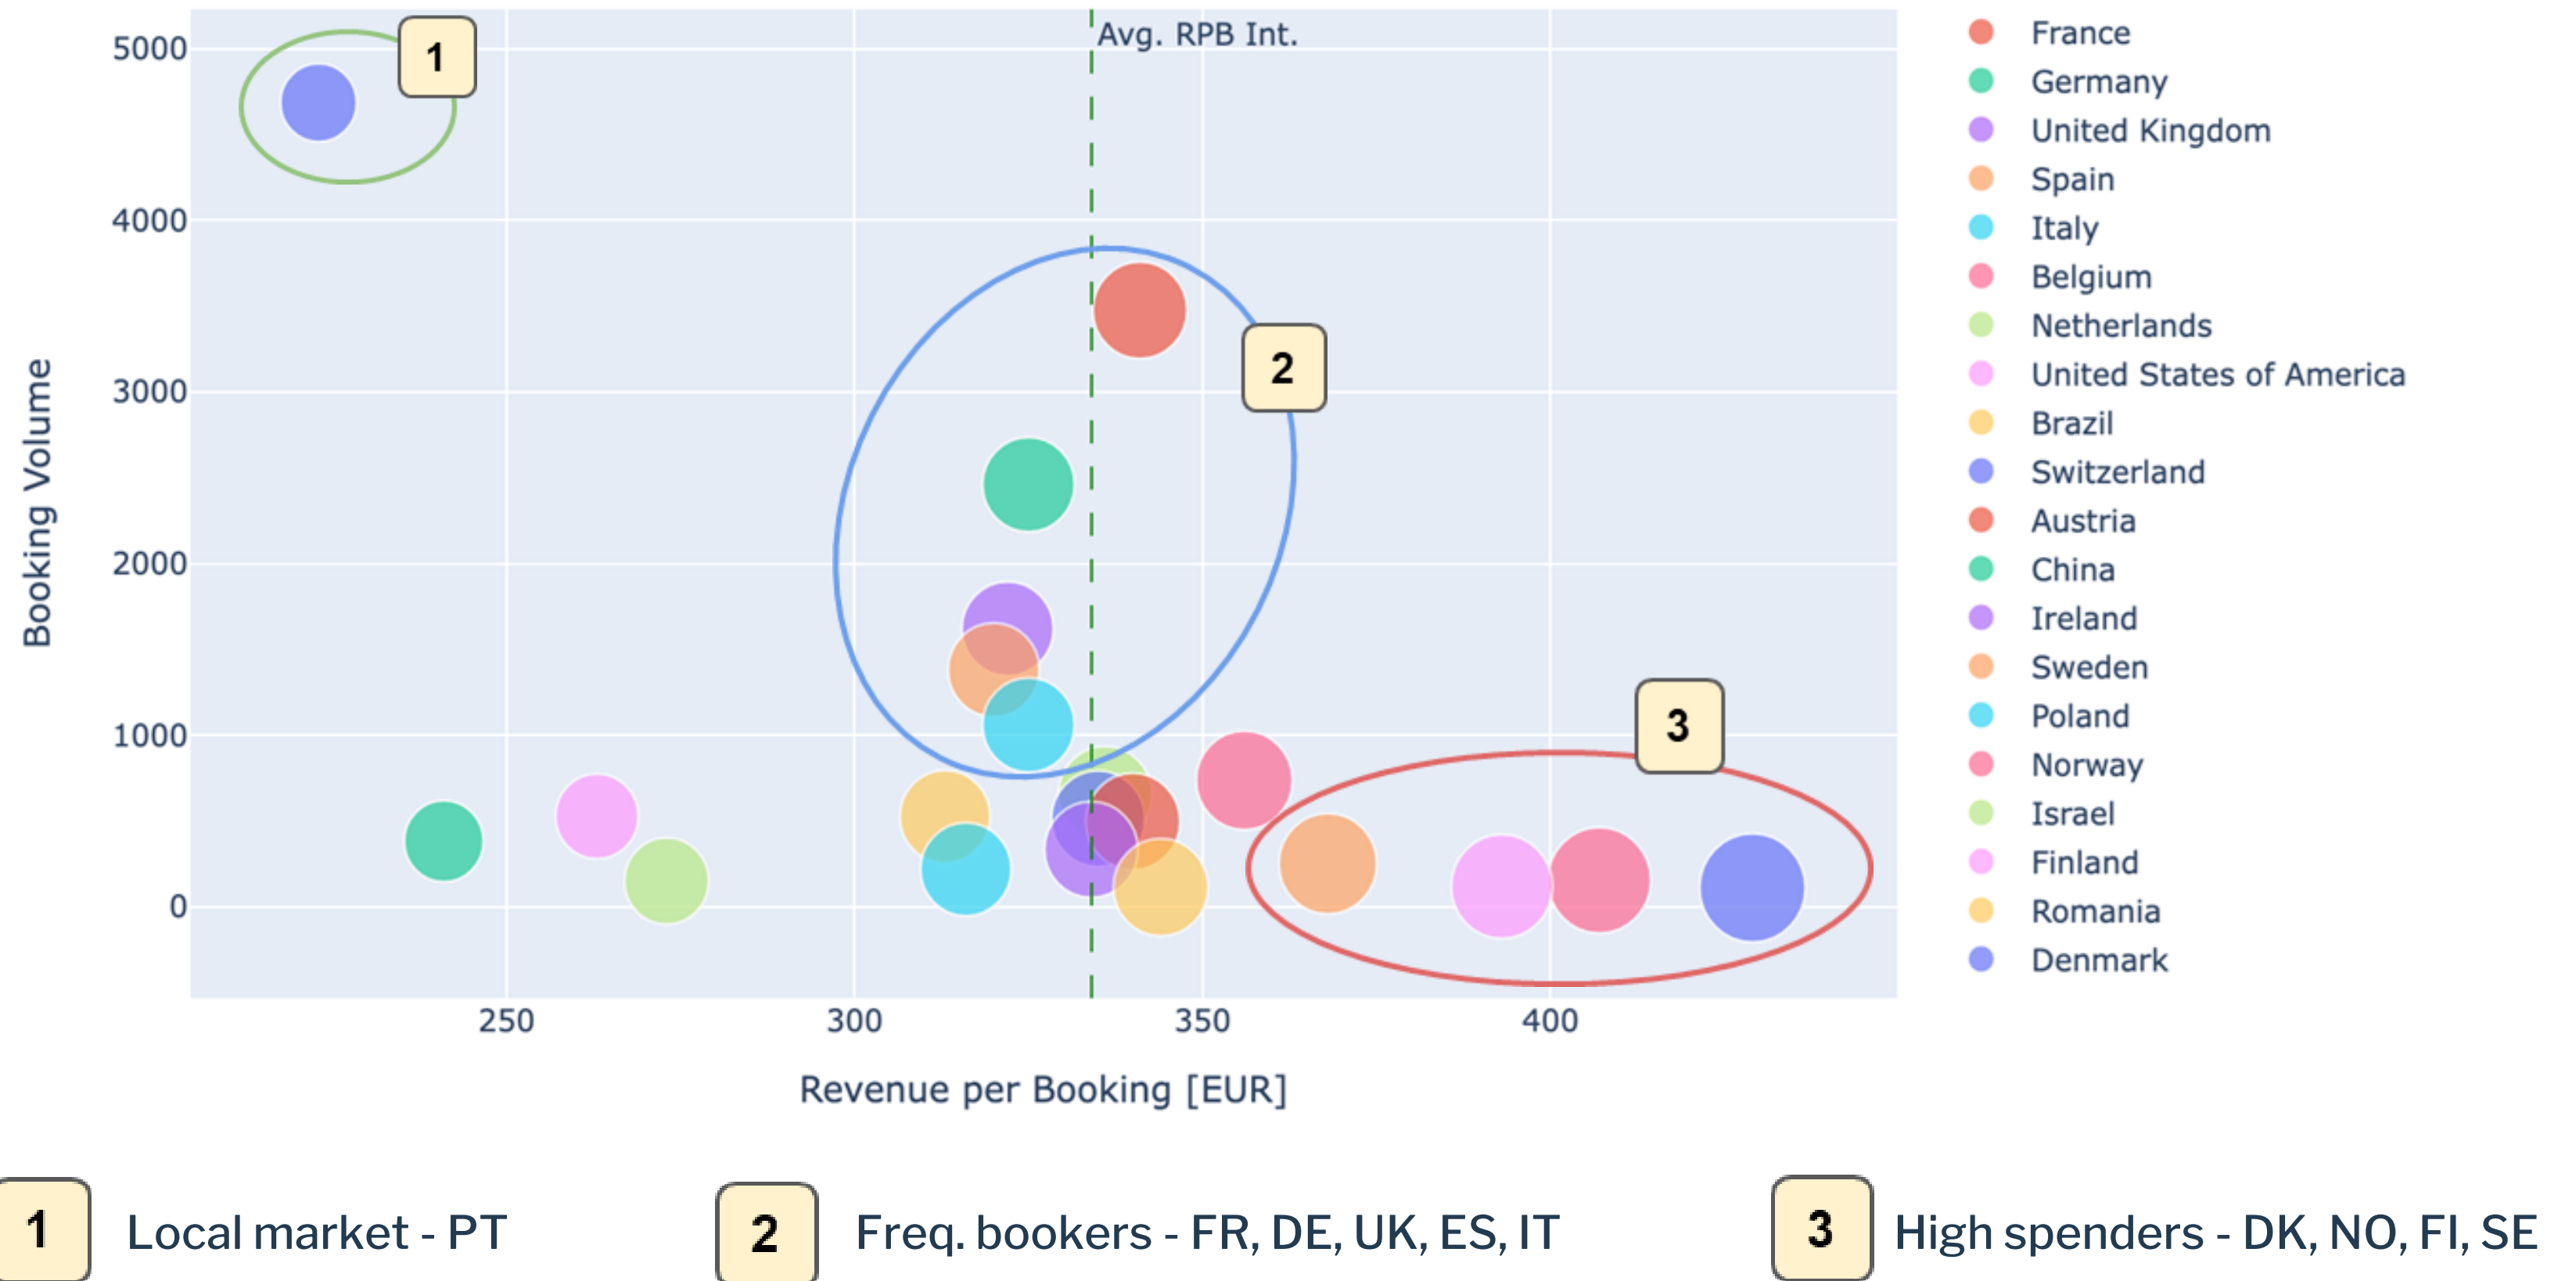

Resort Hotel received guests from 91 countries.

Top regions:

1. Northern Europe - 47%
2. Western Europe - 22%
3. Southern Europe - 17%
4. Eastern Asia - 4%

# Feeder Markets - City Hotel

# Feeder Markets - Resort Hotel

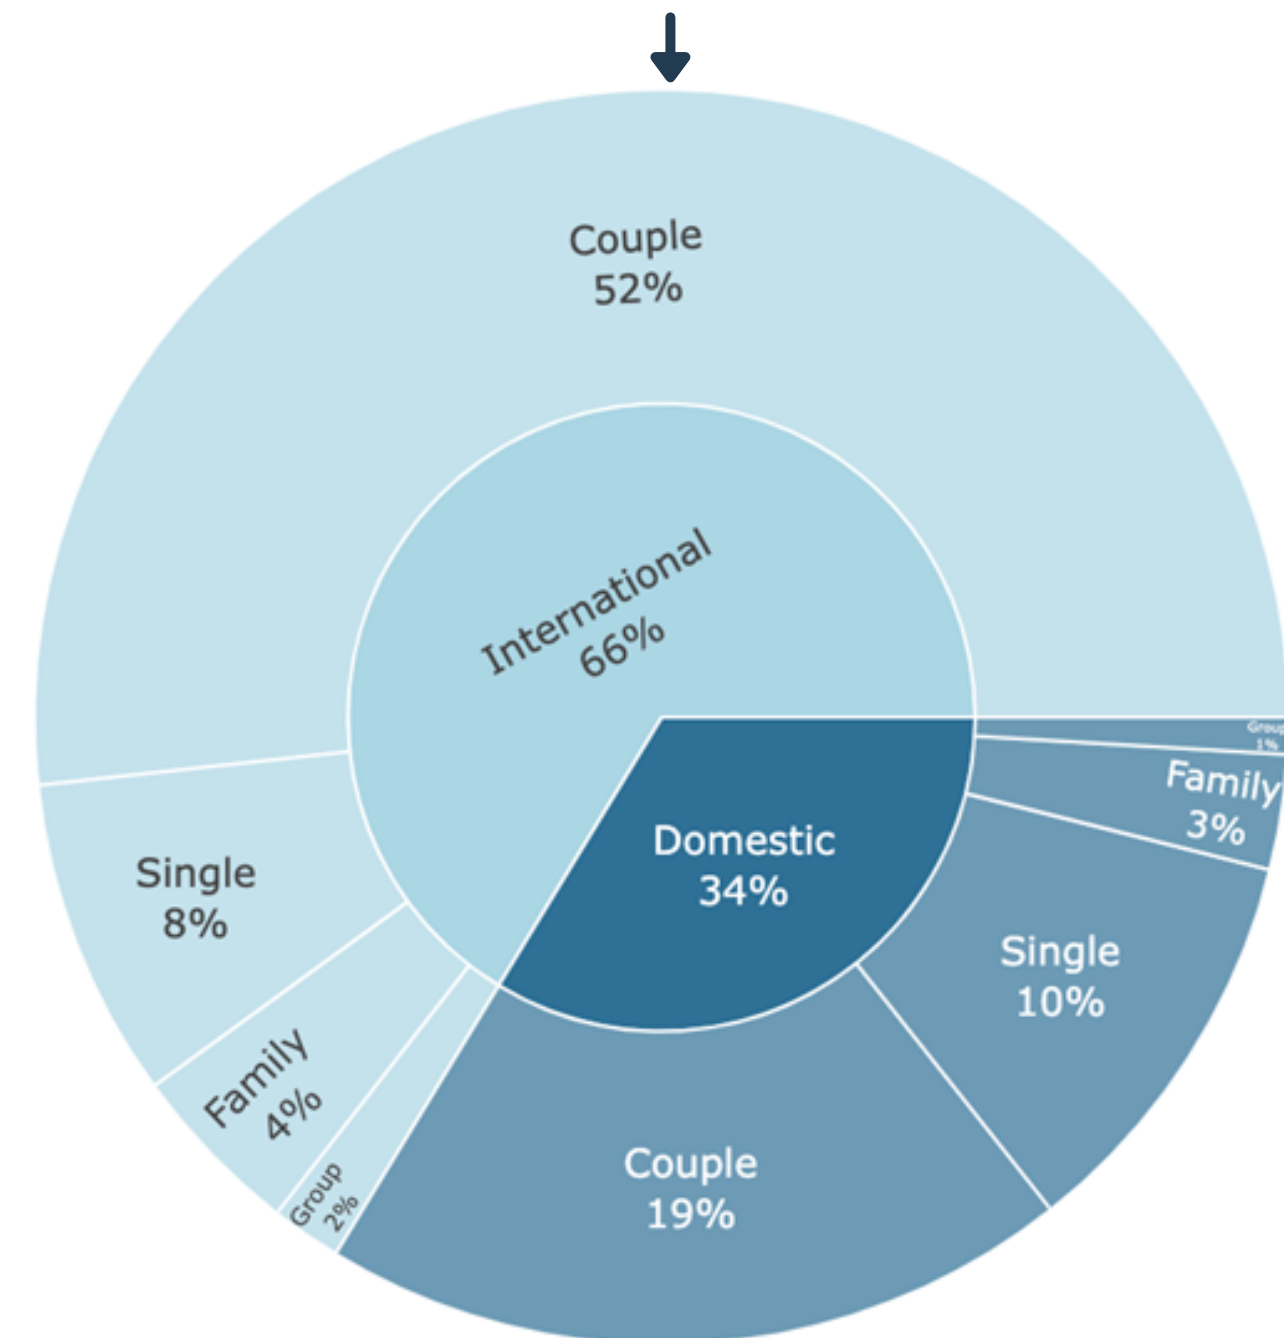

**1** Local market - PT    **2** Freq. bookers - UK, ES    **3** High spenders - NO, RO    **4** Mid. range - IE, CH, IT

# What is the most frequent guest type?

- 53% of annual bookings
- 57% of annual revenue

- 52% of annual bookings
- 60 % of annual revenue

# International couples - more characteristics

## CITY:

- ✈ Stay on avg. 3 days
- ✈ Book approx. 3 months ahead
- ✈ Travel in May and October
- ✈ Spend 325€ on their booking
- ✈ From France, Germany & UK
- ✈ BB meal plan
- ✈ Book by OTA

## RESORT:

- ✈ Stay on avg. 5 days
- ✈ Book approx. 3.5 months ahead
- ✈ Travel in August and September
- ✈ Spend 410€ on their booking
- ✈ From UK, Spain & Ireland
- ✈ BB meal plan
- ✈ Book by OTA

# To wrap up: final observations

- Seasonality varies per hotel type + the importance of taking into account different metrics to evaluate high performing months.
- Slightly different international feeder markets + the high booking volume doesn't always translate into high revenue (Portugal).
- Top performing customer groups identified.

# To wrap up: Possible action points

## WHAT'S NEXT?

- Based on seasonality and feeder markets we can plan the annual budget distribution for marketing campaigns and decide the market targeting
- For couples - develop direct booking offer to drive them away from the OTAs (and avoid commissions)
- For other guest types, investigate their characteristics to drive more visits & diversify customer base
